

DEF PARTNERSHIP WITH LOH FOR NATIONAL NETWORK OF INDIA PROGRAM

DEF formally entered the arts for social change area to address rights through art and cultural expression

The fellows and the organisations who were associated with A-CODE also had their unique journeys. Their unique methods and the feedback and suggestions emerging from this have helped shape different projects of DEF and reimagine them in a certain way.

We have a space to call “our own” now. This space reminds us that digital rights and freedom of expression online are closely linked to creating safe spaces for art and culture and are not mutually exclusive

Museum of Digital Society - Mysore, IN

DEF has showcased impactful programs on gender inclusion, freedom of expression, and the rights of disadvantaged communities

The core mission of DEF is to bridge information poverty through digital means; the network of organisations and individuals has helped us reach more communities to provide training in meaningful digital access and digital rights

In this project, we have built multi-faceted knowledge products such as Humaara MIL Kit for the Multiverse of Digital Fallacies, PodBharat and DEF Dialogues with stakeholders in the arts and culture fields

In order to strengthen freedom of speech and the importance of all voices, we built a special cohort with journalists and young reporters

A-CODE has provided platform for like-minded organisations to come together for a common cause

DEF is able to integrate objectives of LoH in other development projects in collaboration with other organisations, youth, artisans, LGBTQIA+ and other vulnerable communities

We launched a special one-year experiential fellowship where 10 fellows from across the country were selected to become digital leaders and pioneers in the field to advocate and enable the ethos of DEF and LOH sustainably

Through A-CODE, we have been able to strengthen the cultural archive and preservation of our rich heritage

Through the activities conducted, we connected with more organisations that will be added to the A-CODE cohort and take the objectives of the partnership pan-India

Established a podcast recording studio to support artists, human rights defenders, and social movements in recording and sharing dialogues and activities
